

You want to live your best life. Your brain is the engine behind that. **EQ PROTECTS YOUR BRAIN.**

The world's first fully mobile, gamified, multi-trajectory neurological assessment tool.

WHAT IS EQ ACTIVE?

- For medical professionals, amateur athletes/ teams, families and individuals
- Clinically-derived tests, backed by global leaders in neurosciences and clinical medicine
- 7 games: testing cognitive, balance and visual function
- 100% mobile; test anywhere, anytime
- Data-rich, user-friendly management system

WHAT DOES EQ ACTIVE DO?

- Year-round Functional Neurological performance assessment
- Injury assessment with more complete pre-injury state comparisons
- Facilitation of the 'Return to Play/Learn/Work' evaluation
- Real-time tracking of brain performance with comprehensive data
- Allows for in-person and remote care; in-office or anywhere in the world

EQ is medically cleared in the US (FDA 510k), EU (CE Marking), Canada and Oceania.

Dr. Ted Carrick
Senior Research Fellow, Cambridge University, UK

“ Whether it is for an individual, an athlete, or a health care professional caring for patients, EQ Active’s mobile testing and continual collection of relevant clinical data is unlike any platform I have seen. ”

THE EQ ACTIVE PLATFORM

EQ Active Brain Performance is a multiple-award winning platform backed by some of the world's leaders in neurological study, becoming the first solution of its kind to receive FDA clearance. It combines mobile game-based testing, multiple trajectories of brain performance, and the ability to produce data that would realistically not be achieved otherwise. For the first time, and in an affordable manner, users can track their brain performance on a regular basis and clinicians can monitor and assess patients using continuous, holistic data. EQ Active allows you to live your life with the comfort of knowing that your brain performance data is perpetually available for comparison should a concerning event take place, giving you the best opportunity to get back to where you want to be.

TESTING

- Fun games that are designed for ongoing use
- Utilizes current and clinically established neurological tests that have been gamified
- Games are fully mobile (phone/tablet). Test any time, anywhere
- 7 tests covering cognitive, balance and visual function
- 'Check-ins' completed in as little as 10 minutes

ASSESSMENT

- Real-time data and analytics
- Results on mobile devices for users, on EQ Dashboard for clinicians/administrators
- Manage and communicate directly with patients, athletes and users
- Receive notifications for concerning results
- Establish and monitor compliance schedule
- Export results for medical review

IMPLEMENTATION

- Ongoing assessment of neurological performance instead of error-prone and controversial single baseline test
- Dashboard monitoring allows for continuous patient/clinician relationship
- Post-incident feature assesses 'Return to Play/Learn/Work' status and assists decision
- Inexpensive subscriptions are year-long, ensuring continuity and long-range data
- Identify performance concerns: anxiety, sleep issues, stress

ABOUT EQ ACTIVE

For Group or Individual Use

Used by clinics, sports leagues/teams, parents, and individuals who are looking to monitor and protect their brain health.

Data-rich Dashboard System

Individual results immediately available in-app. Clinicians or administrators can dive deeper on the EQ Dashboard for thorough assessment.

Seven Games Testing Three Clinical Trajectories

Clinically derived tests for cognitive, balance, and visual function.

100% Mobile & Affordable

Do you have a phone or tablet? Test anywhere at any time, and for less than a latte per month

Ongoing Functional Neurological Testing & Monitoring

Engaging games means better compliance for ongoing testing and a better record of an individual's health.

Fast & Fun

Complete a full check-in in as little as ten minutes — unless the games keep you coming back for more!

MEDICAL ADVISORY BOARD MEMBERS

Dr. Christopher Giza / UCLA
• Clinical consultant for the NFL, NHL / NHLPA, NBA, MLB and MLS

Dr. Grant Iverson / Harvard
• 3-time panel member for the renowned International Conference on Concussion

Dr. Ted Carrick / Carrick Institute
• Treated Olympic, College, and Pro athletes; well known for his work with Sidney Crosby

“Being a concussion-focused clinic, adding EQ to our clinical tools has been amazing. Having instant access to client data provides the athlete/parent a sense of calm and connection with us as their health care team! For us – it allows us to monitor the client's neurological function and identify possible issues SOONER! All in all, EQ allows us to offer the QUALITY of care we want for our clients, setting a new standard for brain care!”
